

TECHNICAL TASK

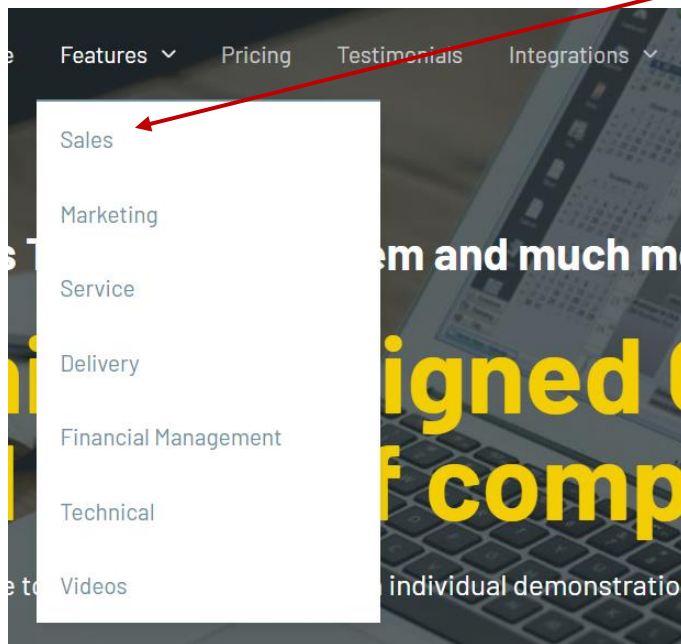

- 1) We will continue using Elementor.
- 2) When clicking on the 360 Business Tool logo, you should access the Home page.
- 3) The menu line should contain Features – Pricing – Testimonials – Integrations – Industries – Service – About Us, as it is now on <https://www.demomadsen.dk/front-page/>. “Home” we take away (we can access it by clicking on the logo).

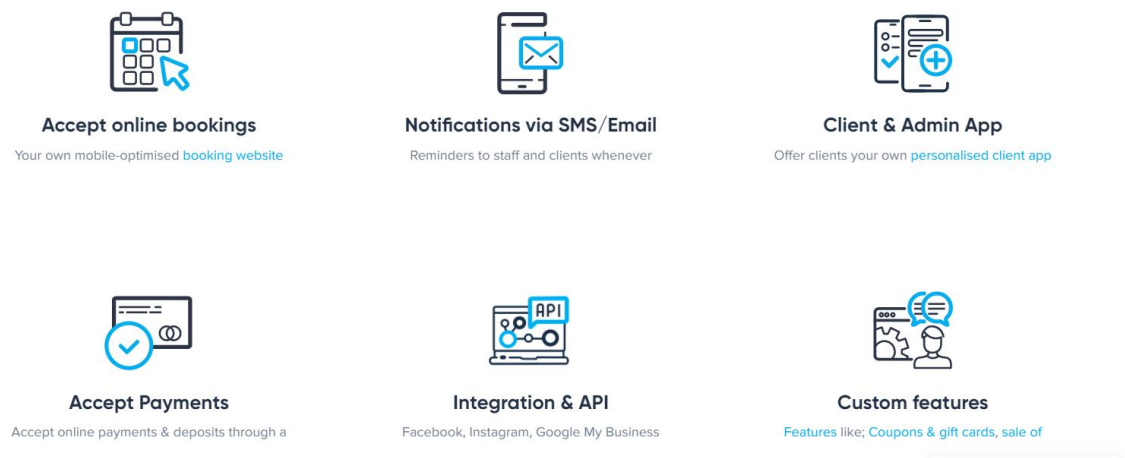

- 4) The submenu needs to look as it is now on <https://www.timelog.com/en/>. (Install a megamenu plugin).

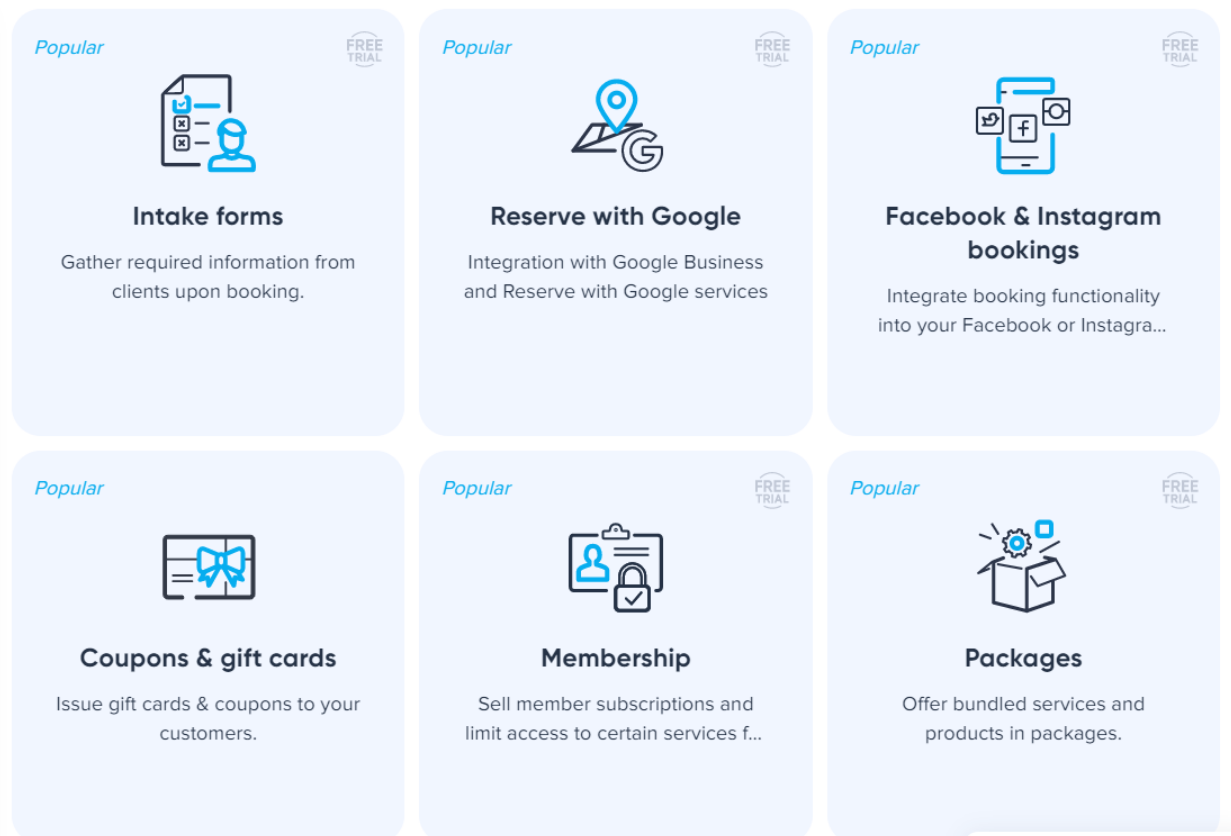

- 5) In the menu, when clicking on the parent page, the user gets the first child page. E.g. when you click on “Features” you get “Sales” (the first child page); when you click on “Integrations”, you get “Market Data”; when you click on “Service”, you get the “Support”; when you click on “About Us”, you get “Overview”.

- 6) For the Features block, use the current one on <https://www.demomadsen.dk/front-page/>. When pointing out at some specific feature, it should enlarge like boxes on <https://simplybook.me/en/>.

- 7) For the Industries block, replace the current boxes on <https://www.demomadsen.dk/front-page/> with the boxes <https://simplybook.me/en/booking-system-features#popular>. In those boxes use only icons and text underneath, without “Popular”, “Free trial”.

- 8) For the icons throughout the page, make them in two colors – black mixed with yellow, see examples on <https://www.pipedrive.com/en/features/manage-leads-deals> and <https://simplybook.me/en/> :

- 9) The blocks under “Main Industries” keep like they currently are on <https://www.demomadsen.dk/front-page/> , adjust make that adjustment to the icons mentioned in the point 8.

Security Is Paramount

We make sure your data is safe with us.

360 Business Tool is committed to providing you with quality service where security is paramount. So, all stored and backed-up data is protected by ISAE 3402 Type II and ISO 27001.

Additionally, we ensure data protection by architecture, as the system was built the way it secures the data you provide through your journey.

According to GDPR, different management rules apply to the different types of information you handle. To answer the requirement, the solution enables you to set up and regulate processes, distribute roles based on the type of personal data you are willing to share. And of course, 360 Business Tool is fully GDPR compliant towards you too.

Among Our Clients

Our Customers Say...

"The reason I recommend your system is quite simply that I have never encountered any other system, which matches it in terms of functionality and user friendliness. The system allows employees to focus on what they do best, and for a very competitive license fee."

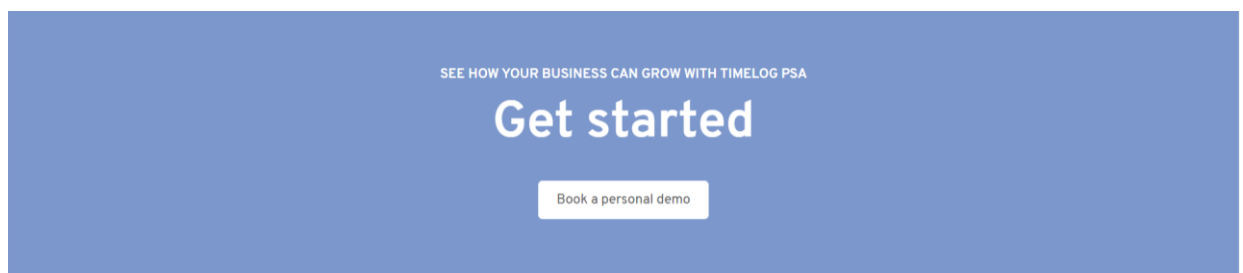

Jan Ingrisch, Operation Manager Building Services
Topdanmark A/S

"360 Business Tool has proven a superb replacement for our legacy customer archive. We have a far better overview of our customers and we can organize our sales activities far more efficiently."

Michael Syberg, Sales Director

- 10) Underneath the “We Are” block, place a block like the one on <https://www.timelog.com/en/>. Under “Get started” add one more button – “GET AN EGUIDE”.

- 11) In the footer, use the blocks we have on <https://www.demomadsen.dk/front-page/>, namely Contact – Support – Get a Demo – Follow Us. Align horizontally the social media icons, and add an icon of Medium. Adjust the color of the Gazelle icon to a more suitable one, and place it underneath the social media icons. Rename “Support” to “Service” and add “GDPR” as the first item in this block, so we have GDPR – Free Support – Downloads.
